HOW TO READ THIS PREVIEW

Facts are checked to November 2. Sprint and Grand Prix orders, the pole lean and tactical assessments are editorial judgments before Qatar practice. Availability is part of the forecast. Contents and numbered source references are clickable.

QATAR: THE WEEKEND AT A GLANCE

Lusail International Circuit | November 6-8, 2026

The Qatar Grand Prix is Round 20 of the revised 2026 calendar. Lusail hosts a Saturday Sprint and Sunday Grand Prix under floodlights, with both starts listed at 19:00 local time by the circuit. This is the November event, following the earlier calendar change.

THE SPORTING STORY

Marc Marquez arrives with the championship lead and a first opportunity to secure the title. Acosta is the immediate form challenger, while Bezzecchi remains Aprilia's fit, active title contender after Malaysia. Winning the race and closing the championship are related questions, but they require separate calculations.

THE ENTRY STORY

Yamaha announced its non-participation on November 1. Alex Marquez has chosen surgery and will miss Qatar. Martin's attempted Malaysia return ended in withdrawal, so his Qatar fitness remains unresolved in this research snapshot. These developments materially change a normal full-grid preview.

THE INITIAL EDITORIAL CARD

Grand Prix: Marc Marquez. Sprint: Pedro Acosta. Pole: Marco Bezzecchi. Projected Sunday podium: Marquez, Acosta, Bezzecchi. These are reasoned pre-practice selections, with moderate conviction in the winner lean and lower conviction in the exact finishing order.

WHAT TO WATCH FIRST

Friday evening Practice will provide the most useful early comparison with the race environment. Look for repeatable pace, comfortable corner exits and a direct route to Q2 before upgrading any prediction.

Sunday, November 8: 16:00 GMT / 17:00 CET / 11:00 EST / 08:00 PST.

THE FULL MOTOGP TIMETABLE

Official circuit starts | Europe and USA | All times are 24-hour

The circuit's published timetable is the reference below. Qatar is UTC+3. GMT, CET, EST and PST apply during this weekend; every converted session remains on the same calendar date. Times are session starts, not television coverage starts.

EIGHT PREMIER-CLASS APPOINTMENTS

Date / session	Qatar	GMT	CET	EST	PST
Fri, Nov 6 | FP1	14:45	11:45	12:45	06:45	03:45
Fri, Nov 6 | Practice	19:00	16:00	17:00	11:00	08:00
Sat, Nov 7 | FP2	14:00	11:00	12:00	06:00	03:00
Sat, Nov 7 | Q1	14:40	11:40	12:40	06:40	03:40
Sat, Nov 7 | Q2	15:05	12:05	13:05	07:05	04:05
Sat, Nov 7 | Sprint	19:00	16:00	17:00	11:00	08:00
Sun, Nov 8 | Warm Up	14:40	11:40	12:40	06:40	03:40
Sun, Nov 8 | Grand Prix	19:00	16:00	17:00	11:00	08:00

DURATION & DISTANCE

FP1 is 45 minutes; Friday Practice is 60; FP2 is 30; Q1 and Q2 are 15 each; Warm Up is 10. The scheduled Sprint is 11 laps, and the Grand Prix is 22 laps.

PICK THE RIGHT CLOCK

Use GMT for the UK and CET for Paris, Berlin, Rome and Madrid. EST and PST are the US Eastern and Pacific standard-time clocks. Follow the organiser's live timetable for any later revision; older calendar listings can carry different Qatar start times.

Both race starts: 19:00 Qatar | 16:00 GMT | 17:00 CET | 11:00 EST | 08:00 PST.

WHAT MALAYSIA CHANGED

Latest completed round | Sepang, November 1

The Malaysia weekend supplied two different winning performances: Acosta took the Sprint, then Marc Marquez won the Grand Prix. The important question for Qatar is which elements survive a change of circuit, rather than whether the entire Sepang order repeats.

MALAYSIA GRAND PRIX: TOP FIVE

Pos.	Rider	Manufacturer	Result
1	Marc Marquez	Ducati	40:14.236
2	Pedro Acosta	KTM	+4.172s
3	Alex Marquez	Ducati	+5.955s
4	Ai Ogura	Aprilia	+6.759s
5	Enea Bastianini	KTM	+10.896s

THE TWO SIGNALS TO CARRY FORWARD

Marquez's Sunday margin supports the race-winner lean; Acosta's Saturday victory supports a separate Sprint selection. The wet-dry Sprint was not a clean laboratory test of dry Qatar pace, so the result deserves context rather than a direct lap-time comparison.

THE REST OF THE PICTURE

Bezzecchi finished sixth, ahead of Marini, Di Giannantonio, Binder and Morbidelli. Bagnaia was 13th. Our forecast deliberately asks Bagnaia to rebound, while retaining several riders who already delivered a tidy points finish.

ONE PODIUM DOES NOT CREATE AN ENTRY

Alex Marquez's third place is part of the form record. His subsequent surgery decision removes him from our Qatar selections. Keep the race result and the next-round availability decision separate.

Recent results establish the starting evidence; Friday at Lusail will test its transferability.

Research snapshot: November 2, 2026

THE CHAMPIONSHIP PICTURE

Riders' standings after Malaysia | Before Qatar

Marquez leads Martin by 44 points and Bezzecchi by 67. With Qatar, Portugal and Valencia still scheduled, a maximum of 111 points remains available to an individual rider across three complete Sprint-and-Grand-Prix weekends.

TOP TEN IN THE RIDERS' CHAMPIONSHIP

Pos.	Rider	Bike	Points	Gap
1	Marc Marquez	Ducati	399	Leader
2	Jorge Martin	Aprilia	355	-44
3	Marco Bezzecchi	Aprilia	332	-67
4	Pedro Acosta	KTM	295	-104
5	Ai Ogura	Aprilia	278	-121
6	Fabio Di Giannantonio	Ducati	265	-134
7	Raul Fernandez	Aprilia	236	-163
8	Alex Marquez	Ducati	197	-202
9	Francesco Bagnaia	Ducati	173	-226
10	Enea Bastianini	KTM	134	-265

WHO IS STILL MATHEMATICALLY IN RANGE?

The four riders within 111 points are Marquez, Martin, Bezzecchi and Acosta. Ogura, 121 behind, cannot overhaul the leader using the remaining maximum. This is arithmetic assuming the published calendar and full points remain available.

WHY THE GAP AFTER QATAR MATTERS

Two weekends would remain after Lusail, worth at most 74 points. A lead greater than 74 over every remaining rival is therefore an unambiguous clinch. A gap of exactly 74 needs the official countback position. Page 18 works through a concrete scenario.

A possible Qatar title celebration is conditional; the championship is not already decided.

LUSAIL: WHERE THE LAP IS WON

A flowing desert circuit with a long main straight

The official circuit specification lists 5.38 km, 16 corners, ten right-handers, six left-handers and a 1,068-metre longest straight. The Grand Prix distance is 22 laps, or 118.36 km. Those dimensions frame the following tactical reading.

THE STRAIGHT BEGINS AT THE FINAL EXIT

A rider who exits the last corner cleanly can arrive at the next braking zone with both speed and a credible passing option. Watch the gap at corner exit and again near the end of the straight: that comparison helps distinguish drive from slipstream assistance.

CARRY SPEED WITHOUT BORROWING TOO MUCH GRIP

Our technical focus is the ability to join the flowing corners without repeated corrections. A spectacular first sector means little if the rider must overwork the rear tyre to recover lost momentum through the next sequence.

PASSING IS A TWO-CORNER PROBLEM

A late braking move can gain a place but leave the bike poorly positioned for the exit. The more useful pass is one that also protects the next acceleration phase. Assess whether an attack creates a lasting change in the order or merely exchanges positions.

WHAT WOULD STRENGTHEN A WINNER CASE

A clean qualifying lap, repeatable race-distance rhythm and exits that remain strong late in a run would make a more complete case than maximum speed alone. These are editorial observation priorities, not measured 2026 advantages assigned to a manufacturer.

Look for a complete lap: braking, corner flow and acceleration have to work together.

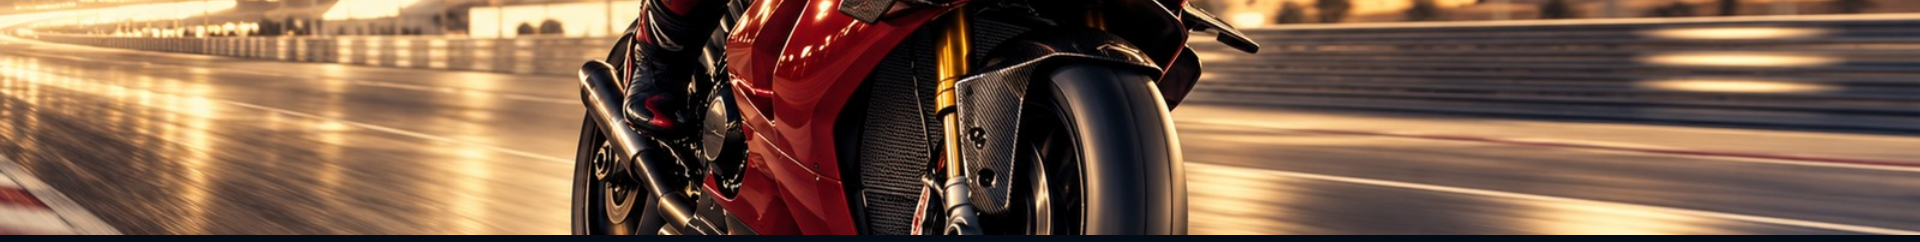
Research snapshot: November 2, 2026



MARC MARQUEZ: THE RACE LEAN

Ducati Lenovo Team | Our initial Sunday winner selection

Marquez arrives on 399 points following his seventh Grand Prix win of the season. Our preference for him is built on the combination of current championship position and his latest complete-race performance, rather than a claim that Lusail guarantees a Ducati victory.

HIS MOST CONVINCING WINNING ROUTE

Qualify on the front two rows, avoid an opening-lap delay and establish a pace that does not demand repeated recovery moves. Leading early would also let him choose how hard to push without responding to every rival's attempt to unsettle the race.

WHY THE TITLE DOES NOT REQUIRE A RECKLESS ATTACK

A large championship advantage changes the value of a marginal pass. If the race win requires an unusually risky move for a small points gain, a controlled podium may be a rational outcome. That possibility is one reason our winner lean is moderate rather than absolute.

WHAT COULD BEAT THIS SELECTION

A rival with a better front-row launch and a stronger late run could turn track position into a genuine obstacle. We would revise the order if Marquez repeatedly needs a fresh tyre to match a rival's representative pace, or cannot stay close without losing his exit shape.

EDITORIAL VERDICT

Grand Prix first; Sprint second. The selection assumes a normal, dry race and a competitive qualifying position. A difficult Saturday would reduce the advantage before it automatically eliminates the winning possibility.

The strongest Sunday case combines speed with the freedom to manage the championship risk.

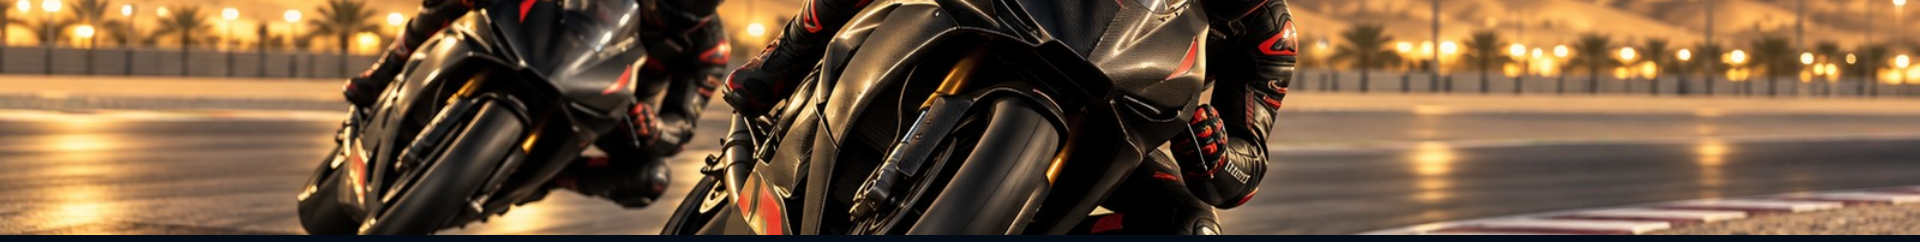
Research snapshot: November 2, 2026



APRILIA: BEZZECCHI & MARTIN

One active front-runner, one unresolved fitness question

Bezzecchi is our pole-position lean and third-place race selection. Martin remains a title challenger in the standings, but his Malaysia withdrawal means we cannot assume a fit Qatar return. The two Aprilia stories therefore need different treatment.

BEZZECCHI'S ATTACK

Our pole choice asks him to assemble one clean lap through Lusail's linked corners, then use a front-row start to stay out of the chasing pack. This is an editorial projection; no Qatar qualifying session has happened at the research cutoff.

FROM A FAST LAP TO A PODIUM

His race case improves if the same corner speed survives a longer run without increasing tyre stress. We would move him ahead of Acosta if the Aprilia shows that repeated pace and Bezzecchi can hold a useful position through the opening lap.

MARTIN: THE DECISION COMES BEFORE THE PREDICTION

The latest completed medical story is his withdrawal from Sepang after trying to ride with the wrist injury. Qatar clearance and competitive endurance remain unconfirmed here. Earlier permission to attempt a Malaysia session is not a Qatar medical clearance.

IF MARTIN IS CLEARED AND COMPETITIVE

Treat him as a potential front-six disruptor, then reassess after representative running. We do not insert him into a fixed finishing slot on the baseline card. His return could displace any rider below the strongest leading group, and a clearly strong run could justify a larger upgrade.

Bezzecchi is a firm selection; Martin's sporting forecast depends on a new medical and track assessment.

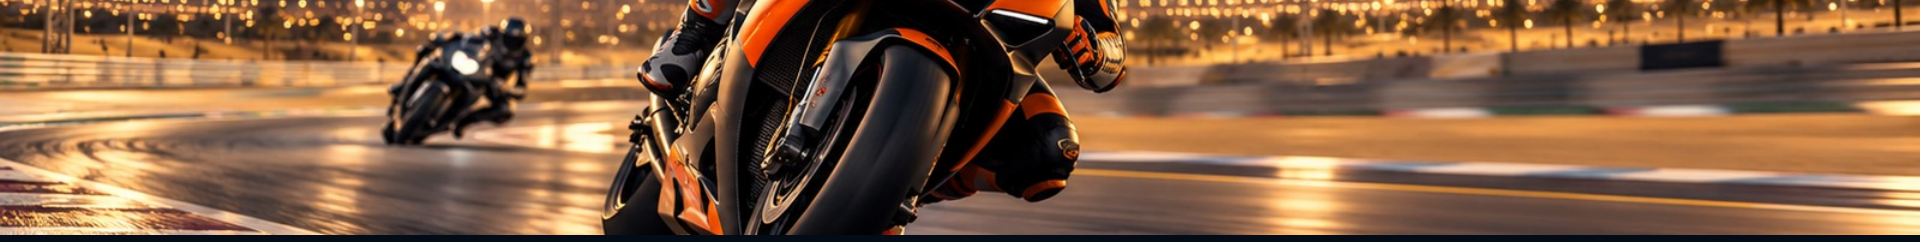
Research snapshot: November 2, 2026



ACOSTA & KTM: THE MAIN CHALLENGE

Factory KTM and Tech3 | Separate Sprint and race opportunities

Acosta's Malaysia Sprint win and Sunday second place give him the strongest immediate alternative to our Grand Prix favourite. He is our Sprint winner and second-place Sunday selection. That splits the prediction according to race length instead of treating both contests as identical.

ACOSTA'S EARLY-RACE OPPORTUNITY

In an 11-lap Sprint, a decisive launch and a clean first passing opportunity can shape a large share of the race. Our selection assumes he can attack while still keeping enough tyre performance to defend after taking the lead.

WHAT WOULD TURN SECOND INTO FIRST ON SUNDAY

He needs more than one outstanding braking move. Staying close through the middle of the race, retaining a strong final-corner exit and avoiding repeated corrections would let him keep pressure on Marquez when the race becomes a contest of consistency.

BASTIANINI & BINDER

Bastianini is projected seventh and Binder ninth. The former's Malaysia fifth place supports a points case, while our assessment leaves room for a stronger late phase. Binder's route is to retain a usable grid position and avoid spending the race recovering places lost in the opening corners.

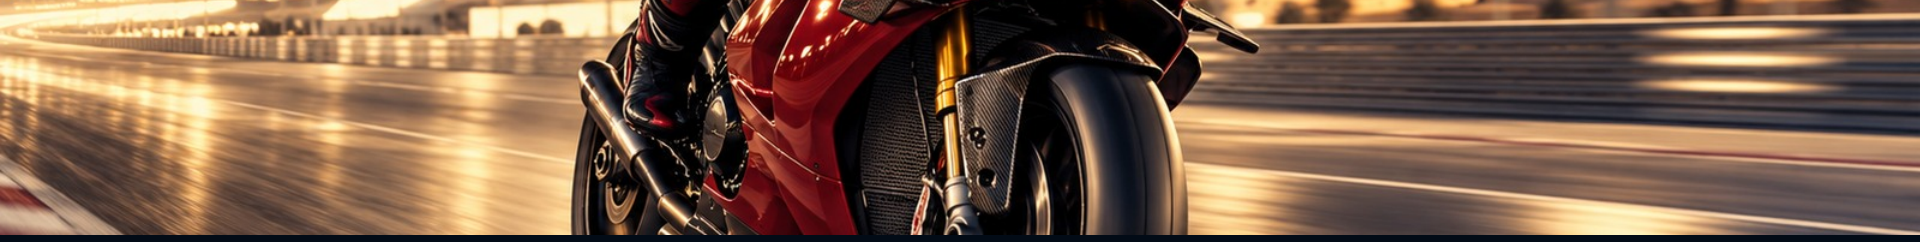
THE KTM COMPARISON TO MONITOR

If the factory and Tech3 riders show different strengths, compare the phase of the lap and tyre age before assigning the difference to the motorcycle alone. A clear Acosta advantage on comparable runs would strengthen the challenger selection.

Acosta is the leading upset candidate; the best evidence would be speed that lasts beyond the initial attack.

Sources: [5] [6] [8]

Research snapshot: November 2, 2026



DUCATI BEYOND THE FAVOURITE

Bagnaia, Di Giannantonio and Morbidelli

Our forecast places Bagnaia fourth, Di Giannantonio fifth and Morbidelli tenth. That order is an assessment of possible Qatar performance, not a reprint of either the championship table or the Malaysia race classification.

BAGNAIA: THE BIGGEST RECOVERY REQUEST

Thirteenth in Malaysia is a weak immediate result for a fourth-place Qatar projection. The case requires a visible improvement: direct Q2 access, a grid position near the leading group and a long run that does not rely on repeated peak laps followed by recovery laps.

DI GIANNANTONIO: THE MORE MEASURED SELECTION

His fifth-place Sprint finish in Malaysia is evidence of the ability to stay with a competitive chasing group. We project him fifth in Qatar's Grand Prix because a clean weekend could turn that pace into a stronger Sunday result. The exact slot remains sensitive to Martin's possible return.

MORBIDELLI: THE FINAL TOP-TEN PLACE

The initial tenth-place choice has low conviction. He needs a manageable first lap and enough sustained pace to hold off the next Honda or KTM challenger. A grid position several rows behind the direct rivals would be a clear reason to change this selection.

WHAT WOULD REORDER THE DUCATIS

Qualifying alone should not settle the internal comparison. Use it alongside the quality of the representative long run. Bagnaia's recovery case should be downgraded if Di Giannantonio consistently carries better pace on similar tyre ages.

Bagnaia offers upside, but his forecast needs more new evidence than the winner selection.

Sources: [5] [7] [8]

Research snapshot: November 2, 2026

OGURA, HONDA & THE NEXT GROUP

The riders who can alter the podium and points order

Ogura finished fourth in both Malaysia contests, making him an obvious podium outsider. Our sixth-place Sunday projection is cautious about the circuit change, not dismissive of his recent form. Marini is the first Honda on the baseline top-ten card.

OGURA'S ROUTE TO SOMETHING BIGGER

A clean first lap could place him close enough to exploit a fight among the front three. We would upgrade him if his long-run pace matches the leaders without needing a slipstream, and if he can overtake rather than simply remain attached to the group.

MARINI'S POINTS CASE

Malaysia seventh provides a recent finishing reference. We place him eighth for Qatar, asking for a competitive qualifying group, controlled tyre use and a race without avoidable position losses. That is a practical points forecast rather than an assumption of podium-level Honda pace.

THE OTHER HONDA OPTIONS

Zarco, Mir and Moreira remain possible challengers to the last top-ten places. They are outside the initial card because the evidence does not justify putting everyone into the same ten slots. Their route in is a clearly stronger qualifying-and-long-run combination than the selected points outsiders.

WATCH THE SHAPE OF THE PACK

If the leading riders escape while the next group repeatedly trades positions, the rider who keeps clean exits and avoids contact may gain more than the one who produces the single fastest lap. That is the race pattern this group needs to manage.

Ogura is our most interesting podium outsider; the lower top-ten positions remain open to revision.

WHO IS AVAILABLE FOR QATAR?

Entry and fitness snapshot | Checked November 2, 2026

Availability changes the forecast before lap time does. The baseline selections exclude announced absences and riders whose recovery or replacement status is unresolved. This is a news snapshot, not a final official starting list.

CONFIRMED NEWS AND OPEN QUESTIONS

Rider / group	Status in this guide	Forecast consequence
Yamaha programme	Non-participation announced	No Yamaha riders selected
Alex Marquez	Surgery; missing Qatar	Excluded despite Sepang podium
Jorge Martin	Withdrew in Malaysia	Return requires new confirmation
Raul Fernandez	Unfit at Sepang: fingers	Qatar clearance not confirmed
Fermin Aldeguer / Gresini	Sepang used a replacement	Qatar rider choice not assumed

WHAT HAS ACTUALLY BEEN ANNOUNCED

Yamaha's November 1 statement keeps its company travel restrictions in place and looks toward Portugal. MotoGP Group says its current event plans remain in place. Gresini's post-Malaysia statement confirms Alex Marquez's decision to stop for surgery.

WHAT STILL NEEDS AN UPDATE

Martin and Fernandez require fresh status checks; a Malaysia session clearance or attempt does not carry an automatic Qatar guarantee. Gresini's exact replacement arrangement should come from the team or official entry documents.

HOW THE CARD SHOULD CHANGE

If an unresolved rider is confirmed fit and demonstrates competitive pace, rebuild the affected positions on merit. Do not quietly add a name to the existing ten and leave an eleven-rider top ten.

The final entry list and medical decisions take priority over every forecast in this preview.

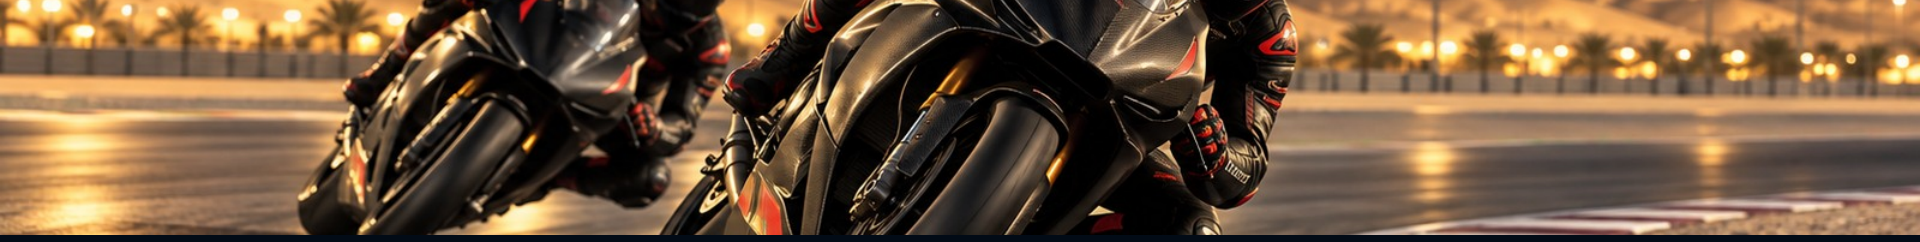
Research snapshot: November 2, 2026



QUALIFYING: ONE GRID, TWO RACES

Friday Practice, Q1 and Q2 | Our initial pole lean

MotoGP qualifying supplies the grid for both the Sprint and Grand Prix, subject to any applicable penalties. A weak Saturday can therefore compromise two scoring opportunities, which makes Friday's direct-Q2 contest particularly valuable.

THE ROUTE INTO Q2

The top ten from Friday Practice progress directly to Q2. The remaining riders enter Q1; the fastest two there join the Q2 group. FP1 and FP2 are preparation sessions rather than an alternative way to qualify directly. Each qualifying segment lasts 15 minutes.

WHY Q1 IS MORE THAN AN INCONVENIENCE

Another short session adds a demand for clean track, tyre planning and immediate execution. A favourite can still progress and take pole, but the extra step introduces another opportunity for traffic, a mistake or a yellow flag to interrupt the plan.

POLE LEAN: MARCO BEZZECCHI

Our selection is based on an anticipated ability to join Lusail's flowing corners into one lap. Marquez and Acosta are the leading alternatives on this card. The Malaysia front row is useful context, but it is not evidence of a Qatar grid that has yet to be set.

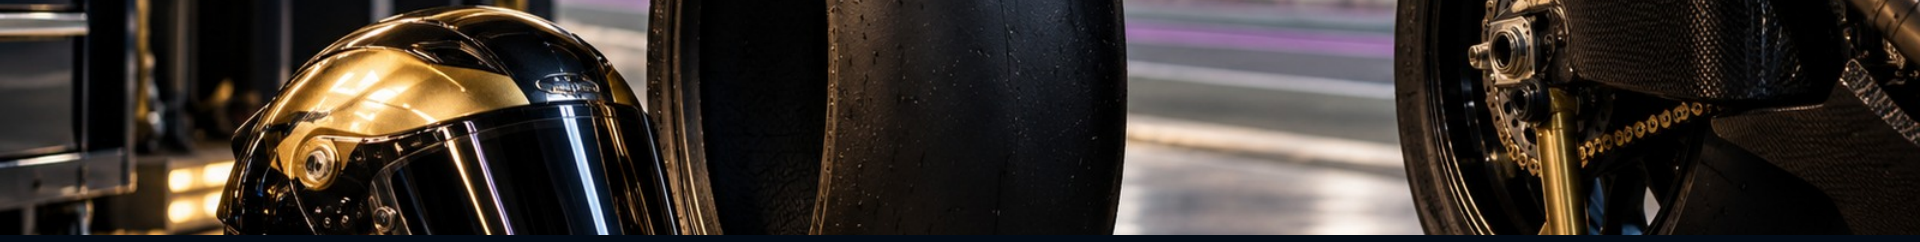
THE CHECK BEFORE UPGRADING THE POLE PICK

Look for a genuinely clean lap rather than one flattered by a strong tow, and compare the rider's repeat attempt. A fast first lap followed by a similar second effort is more convincing than one exceptional lap surrounded by obvious difficulties.

A front-row start helps both races; winning Saturday's Sprint does not set Sunday's grid.

Sources: [3] [14] [15] [16]

Research snapshot: November 2, 2026



TYRES, TRAFFIC & RACE RHYTHM

What the sessions can reveal before the final forecast

The 11-lap Sprint and 22-lap Grand Prix ask different questions of the same motorcycle. This page is a tactical observation guide. It does not claim an unverified 2026 tyre allocation, exact pressure limit or pre-announced winning compound.

COMPARE THE MIDDLE OF THE RUN

Ignore an out-lap, an interrupted lap and a cooling lap when assessing sustained pace. Compare riders over a similar run phase and tyre age. A short burst after a tyre change is useful for qualifying, but it does not establish a complete Grand Prix advantage.

FOLLOW THE CORNER EXIT

Repeated movement or corrections as the rider applies power can be more informative than one speed-trap number. If the exit deteriorates later in a run, the rider may need to spend more of the following straight recovering a gap that began in the corner.

CLEAN AIR AND A PASSING PLAN

A rider who can follow closely still needs a safe, repeatable way to pass. Watch whether the motorcycle can change line into a braking zone and then accelerate without losing the gain. Remaining attached to a rival is a different capability from overtaking that rival.

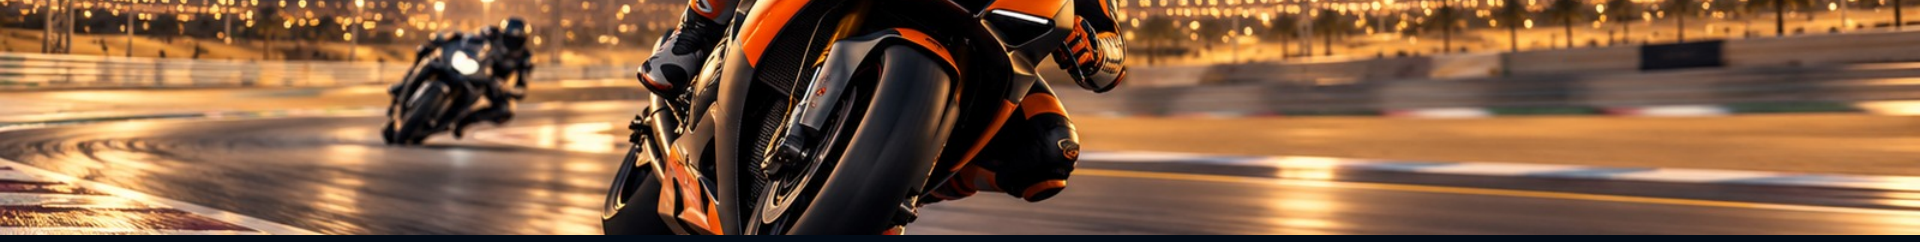
AN EXAMPLE OF A USEFUL COMPARISON

Rider A produces one fast lap, then loses time through corrections. Rider B is slightly slower at the peak but repeats a tidy sequence. For the longer Sunday race, B may offer the stronger case. This is an illustration of analysis, not fabricated Qatar timing data.

Upgrade a race selection when the pace repeats under comparable conditions.

Sources: [2] [3]

Research snapshot: November 2, 2026



THE SPRINT PREDICTION

Saturday, November 7 | 11 laps | Editorial top five

Our Sprint card favours Acosta ahead of Marquez and Bezzecchi. The shorter distance rewards a decisive early position, while the title leader may choose a more measured risk level. No qualifying or Qatar practice result is assumed.

INITIAL SPRINT ORDER

Pos.	Rider	Team	Winning / finishing route
1	Pedro Acosta	KTM Factory	Attack from the opening laps
2	Marc Marquez	Ducati Lenovo	Close enough to control the risk
3	Marco Bezzecchi	Aprilia Racing	Stay with the leading group
4	Francesco Bagnaia	Ducati Lenovo	Convert a stronger grid slot
5	Fabio Di Giannantonio	VR46 Ducati	Beat the next chasing group

WHY ACOSTA GETS THE NOD

His latest Sprint win supplies recent evidence of execution in a compact race. Our Qatar prediction requires a competitive grid position and an early chance to attack. If he starts deep in the pack, that advantage becomes much harder to realise.

WHAT WOULD REVERSE THE TOP TWO

Marquez moves to the top of the Sprint card if he combines a clear qualifying advantage with stronger short-run pace and clean launches. Bezzecchi can upset both if the pole lean proves right and he controls the first corners.

POINTS AND LIMITS

The winner scores 12 points, second takes nine and third seven; only the first nine score. This is a finishing-order opinion, with lower confidence than the broader choice of leading contenders. It is not a result, a betting price or an official model output.

Sprint winner lean: Pedro Acosta | Main alternatives: Marc Marquez and Marco Bezzecchi.

Sources: [3] [8] [13] [16]

Research snapshot: November 2, 2026

THE GRAND PRIX PREDICTION

Sunday, November 8 | 22 laps | Editorial top ten

Marquez is the Sunday winner lean, with Acosta and Bezzecchi completing the projected podium. The baseline assumes a normal dry race and excludes the announced absences plus unresolved fitness returns; it is not an official entry or grid.

INITIAL GRAND PRIX FINISHING ORDER

Pos.	Rider	Team	Assessment
1	Marc Marquez	Ducati Lenovo	Winner lean
2	Pedro Acosta	KTM Factory	Leading challenger
3	Marco Bezzecchi	Aprilia Racing	Podium lean
4	Francesco Bagnaia	Ducati Lenovo	Recovery selection
5	Fabio Di Giannantonio	VR46 Ducati	Front-six candidate
6	Ai Ogura	Trackhouse Aprilia	Close podium outsider
7	Enea Bastianini	Tech3 KTM	Late-race threat
8	Luca Marini	Honda HRC	Points selection
9	Brad Binder	KTM Factory	Points selection
10	Franco Morbidelli	VR46 Ducati	Top-ten outsider

THE TWO POSITIONS MOST LIKELY TO MOVE

Bagnaia's fourth place asks for a recovery from Malaysia; Ogura's sixth could prove conservative if his recent form carries over. The last three places are particularly sensitive to qualifying and a possible competitive Martin return.

CONVICTION & REVISION

Moderate conviction in Marquez as the strongest initial winner candidate; lower conviction in the complete top ten. Upgrade or downgrade after Friday long runs, Saturday qualifying, official medical news and the final entry list. An exact order before those checks is a starting view.

Projected podium: Marc Marquez / Pedro Acosta / Marco Bezzecchi.

Sources: [3] [5] [7] [9] [10] [11]

Research snapshot: November 2, 2026

CAN THE TITLE BE WON IN QATAR?

A worked scenario that does not depend on a tie-break

A complete weekend offers 37 points: 12 for the Sprint and 25 for the Grand Prix. Two scheduled weekends after Qatar offer 74. The following sufficient condition produces a lead of at least 75 over the closest rivals, avoiding any uncertainty about countback.

ONE CLEAR CLINCH SCENARIO

Rider	Before Qatar	Qatar condition	After Qatar / gap
Marc Marquez	399	Wins both: +37	436 points
Jorge Martin	355	Scores six or fewer	361 or fewer / 75+
Marco Bezzecchi	332	Scores 29 or fewer	361 or fewer / 75+
Pedro Acosta	295	At most 29 if Marc wins both	324 or fewer / 112+

WHY THIS WORKS

With Marquez winning both races, another rider can score at most two second places: nine plus 20, or 29. Acosta would therefore be out of reach. Riders already more than 111 points behind before Qatar cannot catch Marquez across the remaining calendar.

THIS IS SUFFICIENT, NOT THE ONLY ROUTE

Other combinations can also decide the title. The official race report describes a smaller gain against Martin as sufficient through countback. This guide uses the stricter greater-than-74 lead for a worked example that needs no tie-break assumption.

KEEP THE EXAMPLE SEPARATE FROM OUR PICKS

Our Sprint forecast has Acosta winning, so the double-win example is not the same as our predicted weekend. Update the actual standings after each race before declaring the championship over.

First calculate the real points totals; then apply the official championship rules.

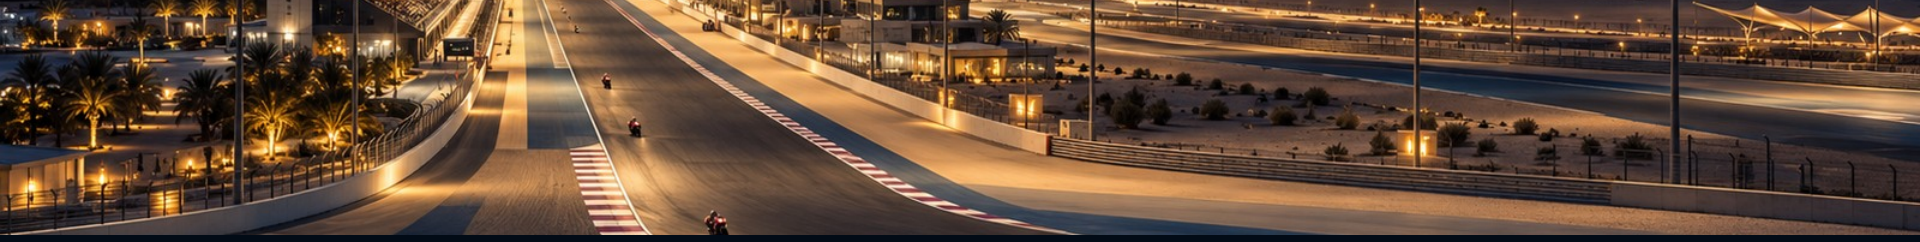
Research snapshot: November 2, 2026



YOUR WEEKEND WATCH PLAN

Three days of evidence | Then Portugal and Valencia

Use the preview as a sequence of decisions. Start with who is actually riding, establish the representative pace, then revise the finishing order. The most useful change is one tied to a specific new observation.

FRIDAY, NOVEMBER 6

Check the final entry news and the medical decisions before FP1. During evening Practice, record who reaches Q2 directly and who repeats competitive laps without excessive corrections. Separate the fastest single lap from the quality of the representative run.

SATURDAY, NOVEMBER 7

Compare the actual grid with the assumptions behind the picks. After the Sprint, ask whether the order was driven by a start, a pass, a mistake or sustained pace. Use the answer to revise Sunday's card instead of automatically copying the Sprint result.

SUNDAY, NOVEMBER 8

Use Warm Up for final status and setup clues, without treating a short session as a full race simulation. The Grand Prix starts at 16:00 GMT, 17:00 CET, 11:00 EST and 08:00 PST. Confirm the final race distance and any grid penalties before the start.

THE LAST TWO WEEKENDS

Portugal is scheduled for November 20-22, followed by Valencia on November 27-29. If the title remains open after Qatar, recalculate the available 74 points and the gap to every remaining mathematical challenger.

The final card should reflect the final entry list, the actual grid and the evidence from Lusail.
